PROJECTS

Customer-Chat-Support —
Web Application (ReactJS, CSS, MaterialUI, SendBird, Redux-Toolkit)

- **Send/Receive** TextMessages and **Sharing Files** and implemented features like **Nested Reply, Download** Shared files, **Typing indicator** etc.
- **Create Group Channels** and **add/remove** members by admins.
- Implemented **Firebase Auth** service for user **Authentication**.

Financial Reports —
Web Application (ReactJS, CSS, ReCharts)

- Developed **Financial Reports** Dashboard with **mobile responsive**.
- Created resuable Charts Component for **Graph Visualizations** using Re-Charts.

TokTown —
Web Application (ReactJS, CSS, Chime-SDK, AWS-S3)

- Send and Receive chats during the Meeting, and implement features like **Sharing Files, Typing Indicator, Delete previous chats**(by admin only), **Hand Raising** ✋ feature etc.
- Save all **Chat logs** into **MongoDB** & render all the previous chats when participants join the Meeting. And save all the Shared files into **AWS-S3-Bucket**.

TokTown-Dashboard —
Web Application (ReactJS, CSS, Redux, AWS-S3)

- Create & manage multiple Meetings & schedule Meetings along with Meeting - Theme, Logo, Promotional Video etc.
- Admin can check the previous meetings summaries like Meeting-logs, Chat-logs etc.
